Generation Query

Original Code

```
int index = this.plot.getIndexOf(this);
                                                              Prefix
CategoryDataset dataset = this.plot.getDataset(index);
if (dataset \neq null)
  return result;
                                               Suffix
int seriesCount = dataset.getRowCount();
Masked Code
int index = this.plot.getIndexOf(this);
                                                               Prefix
CategoryDataset dataset = this.plot.getDataset(index);
<MASK:0>
  return result;
                                               Suffix
int seriesCount = dataset.getRowCount();<MASK:0>
```
